

TP – Sécurisation du site

Sommaire

1. Installation WordFence.....	1
2. Installation Login Lockdown :.....	4

1. Installation WordFence

WordFence permet de vérifier le trafic sur le site web coté client, notamment bloquer les attaques (défiguration etc).

→ On ajoute une extension pour notre site web, WordFence :

Wordfence Security – Pare-feu, scanner de logiciels malveillants, et sécurité de connexion

Firewall, Malware Scanner, Two Factor Auth, and Comprehensive Security Features, powered by our 24-hour team. Make security a priority with Wordfence.

Par Wordfence Security

Actif

5 millions et + installations actives

Dernière mise à jour : il y a 2 mois

✓ Compatible avec votre version de WordPress

→ On clique ensuite sur : *I'm OK waiting 30 days for protection from new threats*

Are you sure you want delayed protection?

Our firewall rules block exploits targeting WordPress plugins, themes and core. Our malware signatures detect whether your site has been compromised. We release firewall rules and malware signatures in real-time to our Premium customers.

For less than \$12.50 per month (paid annually) you can get real-time firewall rules and malware signatures as we release them. Are you sure you want the free version of Wordfence which receives firewall rules and malware detection 30 days later than our Premium customers?

I'd like real-time protection!

I'm OK waiting 30 days for protection from new threats

→ On renseigne notre mail, puis on clique sur Yes et on accepte les conditions :

Get Wordfence Free

Site URL: <https://dianamargarian.fr>

Email

margariandiana03@gmail.com

This is where you will receive your license key and any future security alerts for your website

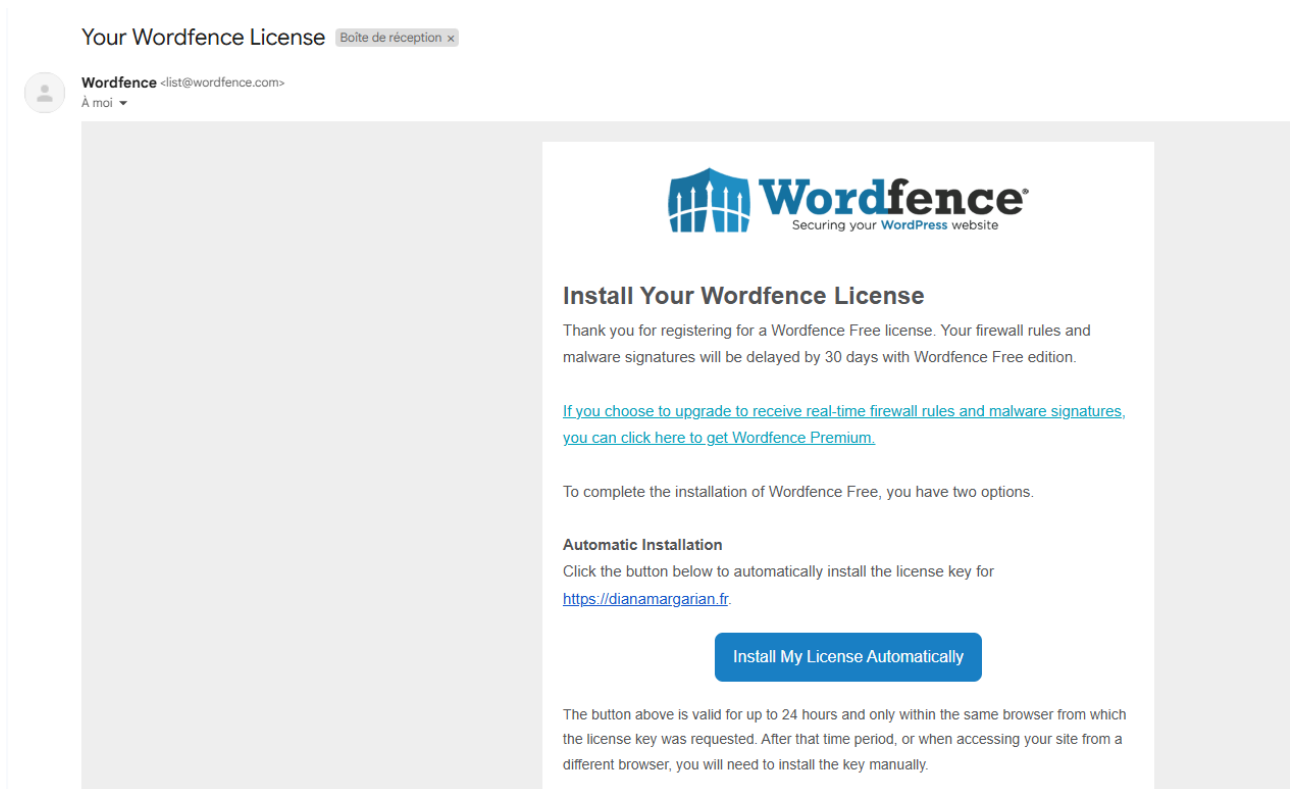

Would you like WordPress security and vulnerability alerts sent to you via email?

Yes No

☒ I have read and agree to, as applicable, the [Wordfence License Terms and Conditions](#), [Wordfence CLI License Terms and Conditions](#), the [Services Subscription Agreement](#), and [Terms of Service](#), and have read and acknowledge the [Wordfence Privacy Policy and Notice at Collection](#).

Register

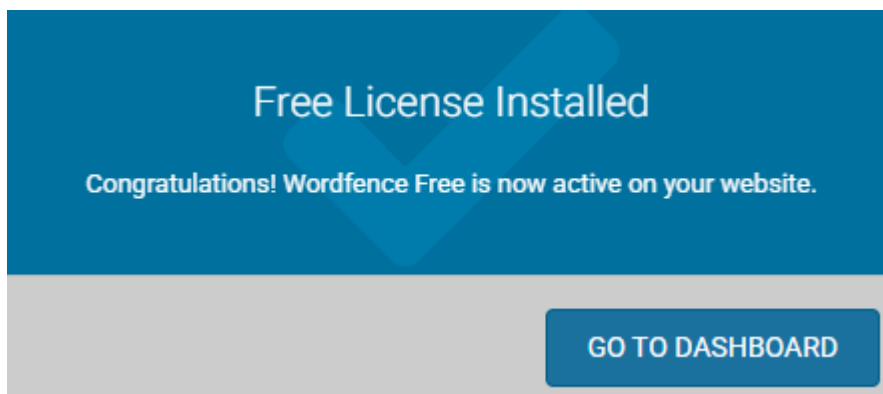

→ Une fois enregistré on va dans notre boîte mail et on appuie sur le bouton Install :

→ Puis on clique sur *Install License* :

The image shows the 'Install Wordfence' form. It has a title 'Install Wordfence' with a logo. Below the title, it says 'Install your license to finish activating Wordfence.' There are two main input fields: 'Email' with the value 'margariandiana03@gmail.com' and 'License Key' with a long alphanumeric string. Below the 'Email' field, there is a small note: 'This is where future security alerts for your website will be sent. This can also be changed in Global Options.' At the bottom of the form is a blue button labeled 'INSTALL LICENSE'.

→ Installation terminée :
